

ZIPPERBAG

"Trusted Manufacturer Service Worldwide"

Zipperbag Co., Ltd.

ZipperBag was established in 2001 as a packaging manufacturer serving customers both domestically and internationally. We use high-quality raw materials and have a quality control system that meets the international standard ISO 9001-2015. With a production capacity of over 400 tons per month and the expertise of our specialized team are capable of manufacturing a wide range of products. Our company specializes in color printing and design, all of us to print in up to 10 colors. This enables us to develop aesthetically pleasing packaging designs and offer various zipper options to accommodate different packaging needs. Additionally, we provide OEM manufacturing services under our customers' brands.

Our delivery process is efficient and modern, ensuring timely shipments to customers both domestically and internationally, including America, Europe, and Japan.

MEDICAL ZIPLOCK BAG

ANTISTATIC ZIPLOCK BAG

ZB-3R (reduce - reuse - recycle)

The products bear the Thai design, reflecting a belief in the power of design to elevate people's quality of life while also contributing to a better world. Therefore, we strive hard to infuse creativity into every product, emphasizing utility, bringing joy and smiles to those who encounter them, aiming to establish a sustainable and environmentally friendly brand. "The environmental issue" is a significant problem that directly impacts every life on this planet because "without the Earth, there is no us." Realizing this importance, Zipperbag cannot remain indifferent. Thus, we begin asking ourselves how we can contribute to change. Leveraging our past potential, we prioritize industrial sectors. Consequently, we create sustainable designs made from recycled materials and leftover resources from manufacturing processes.

Our sustainability approach focuses on eco-design and circular economy principles:

Selecting suitable recycled materials to help solve environmental issues and reduce reliance on new resources.

Designing products that can be recycled when they reach the end of their lifecycle.

Collaborating with various organizations supporting sustainable ideas.

Though environmental problems are reaching a crisis point, we believe it's not too late if we all work

together to initiate change, starting from simple actions within ourselves. Each of us contributing will help build a better world together.

ZB - Meteric Lamp Eco

This Eco-Friendly presents a significant challenge, as we aim for a design that exudes modernity and incorporates metallic elements into the piece. This pushes plastic products in the industry to their limits. The lamp enhances the sense of innovation by simulating real excavation on a computer. It comes in two sizes and two styles to complement modern home decor.

ZB - Meteric Donut Vase Eco

This is designed to bring a modern and stylish atmosphere to your workspace, with a metallic pattern inside to create a beautiful and contemporary look.
